- U.S. Securities and Exchange Commission (SEC)
- 30% of U.S. banks
- 1,200+ U.S. hospitals
- 30+ Blue Cross Blue Shield (BCBS) plans

Transform your email environment into a secure communications workspace.

Be the strongest link in your customer-partner security loop.

Keep your most sensitive data out of reach of cybercriminals, even when sending outside your network.

How it works

Email Message Privacy makes it simple to send and receive secure messages, request or provide legally valid electronic signatures, and share large files directly from a user's existing email address. It all happens with real-time message tracking and control.

As an integral part of Secure Cloud, Email Message Privacy works seamlessly with Zix's other Security, Compliance, and Productivity services in our Secure Suite. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.

Send large files (100 GB) through Outlook or Secure Portal

Full tracking visibility with rights management of messages

Request a **legally-binding electronic signature** within the document

Why Email Message Privacy?

- Remote work makes document signing challenging
- Can't send large files through email, so users rely on unapproved public file sharing apps that may place sensitive data at risk
- Controlling the use of sensitive documents means data can fall into the wrong hands

Features

- Secure message exchange
- Advanced message control and notifications
- Large file transfer—up to 100 GB
- Simple and secure e-signature capability
- Full mobile functionality
- Integrates with Single Sign On (SSO) environments
- Custom branding available
- Only pay for Professional users; Guest users are free

Backed by Award-Winning Phenomenal Care Support
